If such event of force majeure continues for a period exceeding two months, the Supplier shall have a right to terminate this Agreement immediately on written notice to the Company.
- 20.2 For the avoidance of doubt, nothing in this Clause 20 shall excuse the Company from any payment obligations under this Agreement.

21. Governing Law and Jurisdiction

The construction, validity and performance of this Agreement shall be governed by English law and the parties irrevocably submit to the non-exclusive jurisdiction of the English courts.

22. Wavier

23. Severability

The invalidity or unenforceability of any term or any part of any term of, or any right arising pursuant to, this Agreement shall not affect the validity or enforceability of any other terms or rights or the remainder of any such term or right which will continue in full force and effect except for any such invalid or unenforceable provision or part thereof.

24. Entire Agreement

Further to Clause 8 and without prejudice to Clauses [7.2] and [7.3], this Agreement constitutes the entire agreement and understanding of the parties, and supersedes any and all previous agreements, arrangements and/or understandings (whether written or oral) between the parties regarding the Supplier's obligations and liabilities in respect of the supply or purported supply of, the failure to supply or any delay in supplying the Software and the Documentation.

25. Employees

Both parties agree not to solicit staff of the other company for reasons of employment for the duration of this Agreement and for a period of six months thereafter, without the prior written consent of the other party.

26. Survival

The terms of Clauses [5,6, 7, 8, 9, 10, 11 and 15, 16] shall survive expiry, variation or termination of this Agreement. Any other terms of this Agreement which are either expressed so as to survive (or are capable of surviving) expiry, variation or termination of this Agreement or from their nature or context it is contemplated that they are to survive expiry, variation or termination, shall remain in full force and effect notwithstanding expiry, variation or termination.

27. Variation

No variation of, or amendment to, this Agreement shall bind either party unless made in writing and signed by authorised representatives of both parties.

28. Independent Contractors

The relationship of the parties is that of independent contractors dealing at arms' length and except as expressly provided in this Agreement nothing in this Agreement shall be construed so as to constitute the parties as partners, joint ventures or co-owners or empower either party to act for, bind or

otherwise create or assume any obligation on behalf of the other and neither party shall hold itself as entitled to do the same. Nothing in this Agreement shall create or be deemed to create the relationship of employer and employee.

Schedule 1

The Patronus Software (The Software)

The Software shall comprise the most recent versions of the products listed below which have been released by the Supplier and supplied to the Company.

1. Product Description

Patronus DVD copy control technology helps film studios and production companies to protect their assets. It is a passive software solution that encapsulates data files on a DVD disc causing access to the content by common ripping programs to be controlled. The original media content is not modified and play-back quality remains unaffected. This is achieved by introducing copy control encapsulation in areas of the disc that are not read by DVD players during playback. Copy controlled discs are designed to provide effective speed bump protection from unauthorised casual copying. Copy controlled discs have full playability designed to match playability levels in DVD players of unprotected DVDRs.

Copy control is applied through the Patronus software authoring program which adds protection to the ISO image file prior to burning discs. Once protected the ISO files can be processed in the normal way for PC playback, burning to DVDR, distribution or for mastering and manufacturing. Content that is protected in this way can be burnt to disc using standard burn engines.

Independent external testing carried out on the Patronus protected DVDRs confirms reliable levels of protection from mass market ripping programs as well as full playability on DVD players tested. Additional independent security tests carried out by NGS Software also confirm that discs burnt with the passive Patronus authoring software do not load any software onto PC operating systems.
